

CREATING TOMORROW'S WORKSPACE, TODAY

High capacity in-building coverage

Location, amenities, and space aren't the only key differentiators for commercial real estate.

The most successful buildings also offer:

- Robust coverage to eliminate dropped calls or interrupted video
- Ubiquitous connectivity that allows for seamless movement around the property
- Smart building applications that improve operations, reduce costs and minimize carbon footprint
- A great tenant experiences to facilitate the return to the office

With flexible commercial models, we make deploying next-generation networks easy and cost-effective. Our customized infrastructure meets the needs of any tenant space, while avoiding disruption to your day-to-day operations. And by working with all major mobile carriers, we remove the complexity of managing multiple suppliers.

Customized workplace connectivity

Leverage connectivity to deliver enhanced experiences and improved operations.

With employees going into the office 30% less than before¹, properties need to offer attractive spaces that encourage office utilization. Many modern, historical and architectural office buildings use materials and elements that block mobile signals. To develop excellent in-building connectivity, you need to consider the unique factors of the building and the specific needs of your staff, both current and future.

This is where Boldyn Networks can help. Our indoor and outdoor coverage solutions include distributed antenna systems (DAS), Wi-Fi, private and fiber networks. We design, deliver and manage tailored wireless solutions that leverage state-of-the-art technologies.

Create attractive office spaces

- Connected spaces for seamless online collaboration
- Coverage in every corner
- Built-in network capacity designed to scale as needs evolve

Streamline operations

- Smart CCTV to enhance security
- Access control for keyless entry
- Asset monitoring to track equipment and optimize maintenance processes

Meet efficiency and ESG targets

- IoT sensors for energy monitoring
- Automated energy management systems and temperature control
- AI software and alerts for health and safety

1. McKinsey Global Institute, Report, 2023

Your trusted technology partner

Boldyn Networks is the global partner of choice for state-of-the-art connectivity solutions for buildings of all sizes and classes.

Our global ecosystem ensures we work with you to choose the right technology, designed for your needs.

DAS

A DAS provides seamless, scalable support for high-bandwidth applications

Private networks

Private networks offer lower latency and dedicated bandwidth for unmatched reliability

Wi-Fi

Surpass your staff's expectations with high-speed, reliable public or private Wi-Fi solutions

Small cells

Low-profile small cells improve connectivity across 5G, LTE and Wi-Fi deployments

Fiber

Fast. Reliable. Scalable. Fiber offers all the qualities you want in connectivity

30+

Years' experience in communications solutions

300+

Neutral host network venues

6bn

Rides across 5 major transport systems annually, including in New York City, the Bay Area, Seattle, Hong Kong and London, UK

75+

Military bases covered

3

City-wide networks

700+

Employees and access to 1,500+ partner staff

Why Boldyn Networks

In collaboration with your teams, we help you realize your business goals. Our connectivity solutions offer total flexibility to meet your unique coverage needs.

We work with properties of all sizes. Whether you want to upgrade, refresh, or rebuild your communications network, we have the expertise and solutions to modernize your building.
